BIODIESEL FUELING STATION KIT

FILTERED BIODIESEL FROM A HOME ROLL-AROUND STATION

Now you can have your own portable biodiesel fueling station! Just insert the fuel draw tube into the 2" port on your barrel, attach the hose support and connect the power clips to a 12 volt car battery to start pumping biodiesel into your vehicle. The water absorbing filter has a clear housing to check for water and a drain to remove it. The resettable meter measures in gallons. The fill hose is equipped with a gas-station style nozzle to fill up at over 5 gallons per minute. Re-filling the barrel is easily done through the standard 3/4" barrel bung port.

KIT INCLUDES: (barrel not included)

- 12VDC/10A 5GPM diesel transfer pump
- Fuel draw tube kit with screen filter
- 10 micron particle and water-blocking filter
- Spare filter cartridge and housing wrench
- Dispensing meter calibrated in gallons
- 10 foot dispensing hose and nozzle
- Hose support assembly
- Barrel dolly on heavy duty casters

OIL PRE-HEATER KIT

ACCELERATE YOUR PRODUCTION

This kit includes a 1KW heating element with a thermostatic control. Simply wrap the heater band just under the lower ridge on your oil barrel and snap the spring in place.

Then wrap the included special insulation around your oil barrel and reaction tank, and seal them in place with the aluminum tape. Set the thermostat and in 2-3 hours it will heat 40 gallons of oil from 70F to 120F. It will accelerate your biodiesel production process by 5-6X and improve your yields. It's perfect for those cold garages or sheds.

OIL TRANSFER KIT

MAKES OIL COLLECTION A SNAP

This is the easiest way to transfer cooking oil from pails, barrels and tubs into your 55 gallon oil collection barrel. Just connect the pump to a 12 volt car battery, insert the draw tube into the oil vat and turn on the pump. It will transfer oil at about 5 gallons per minute and draws only 10 amps of battery current.

KIT INCLUDES: (barrel not included)

- 12VDC/10A pump with battery clips
- 36 inch draw tube with screen valve
- Draw tube storage holster
- 10 foot clear flexible suction hose
