

Biodiesel Starter Kit

LEARN THE CRAFT OF MAKING YOUR OWN BIODIESEL

"The Biodiesel Starter Kit from Biodiesel Solutions is a great way to learn how to make and test your own biodiesel right in your own kitchen."

Joshua Tickell, Author
**From the Fryer
to the Fuel Tank**

This is the same titration and mini-batch kit that ships with every FuelMeister™ biodiesel processor. With it you can test the quality of used fryer oil. You'll be able to quickly make your own biodiesel on a very small scale. And you'll have the tools and knowledge to analyze your biodiesel for quality. It's a perfect way to prepare for making biodiesel in larger quantities.

Kit Includes:

- Titration toolkit
- pH indicator solution
- Methanol and Titrant supply
- Vial of reference biodiesel
- Set of measuring beakers
- Graduated cylinder
- EZ Mini-batch packets (2)
- FuelMeister videotape
