

Remote Automatic Gate

The Remote Automatic Gate Saves Time, Money, and the Environment.

Features

The Remote Automatic Gate features remote control access (accessible to 100 ft or more) which allows the open and closure of the gate without having to leave a vehicle. It's vertical lifting action is not hindered by obstacles such as snow and livestock. The Remote Automatic Gate is available to fit various openings and includes manual operation. A single solar module powers the 12 volt battery. The Remote Automatic Gate is a fully self-contained unit with no external wiring.

Benefits

The Remote Automatic Gate, an essential piece of equipment for all those involved in the cattle industry, is a device that can save time and money. There is a reduction of fuel costs and environmentally harmful emissions that result from a vehicle being left on. It is an inexpensive alternative to Texas gates with unlimited applications in various fields.
